Mobile

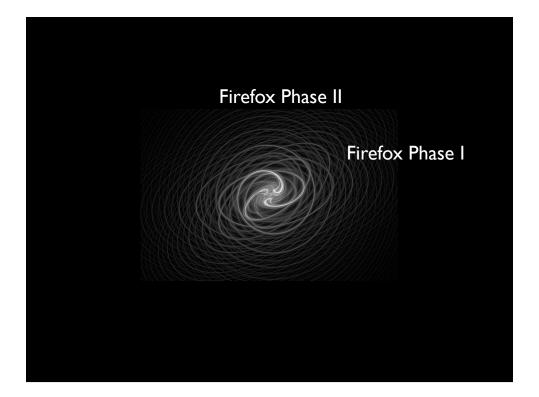

Mobile Firefox 1.0 for Maemo OS expected this December

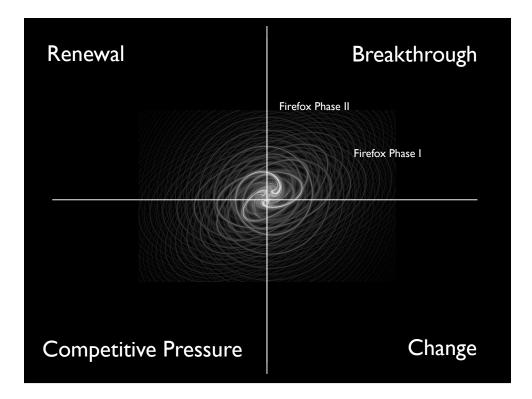

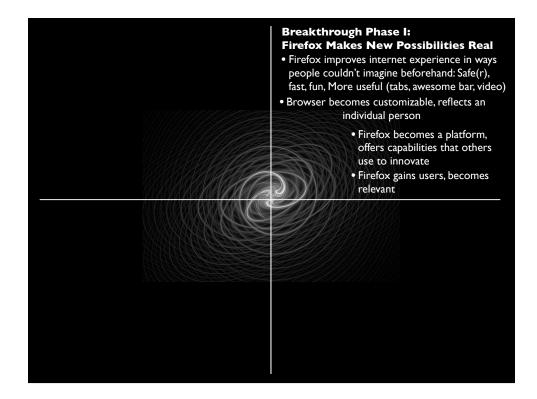

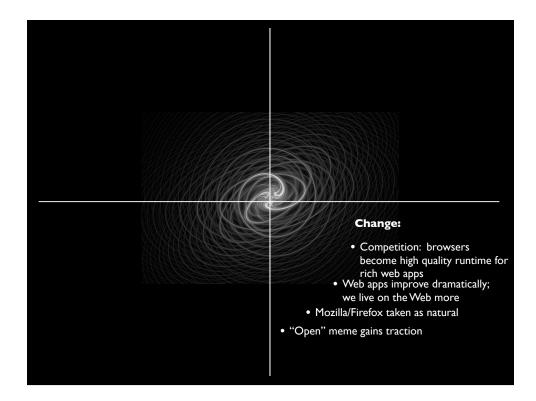

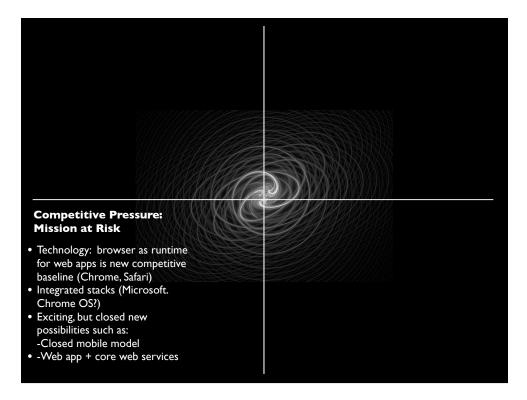

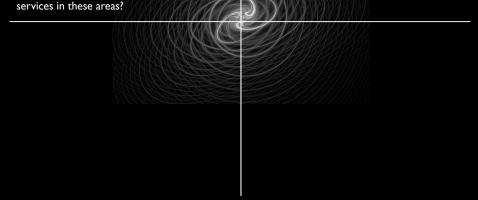

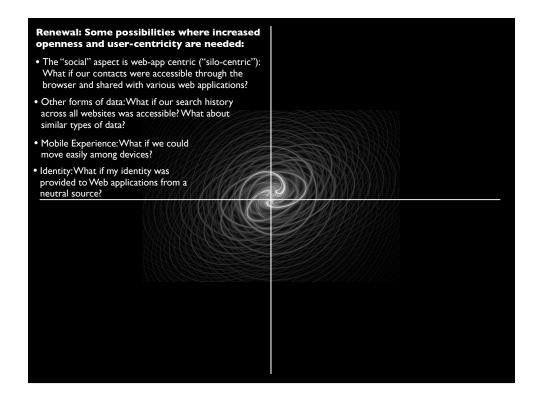

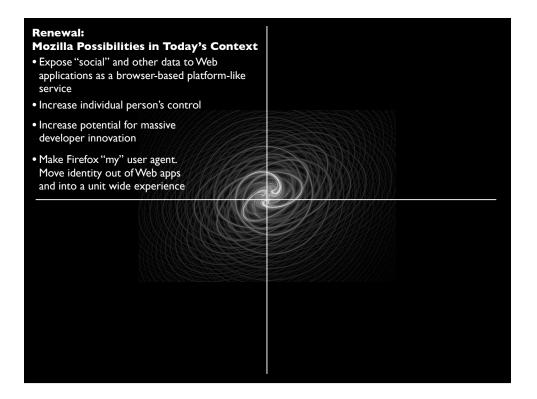

Renewal:

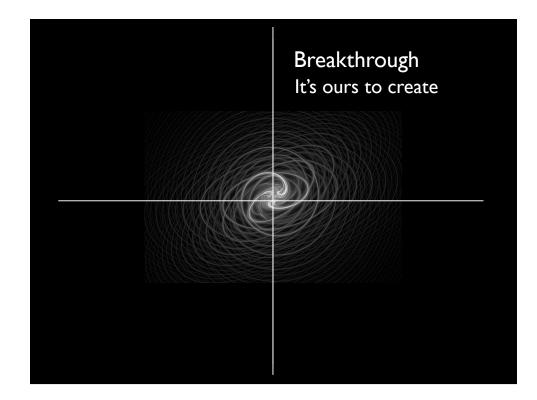

Mozilla Possibilities in Today's Context

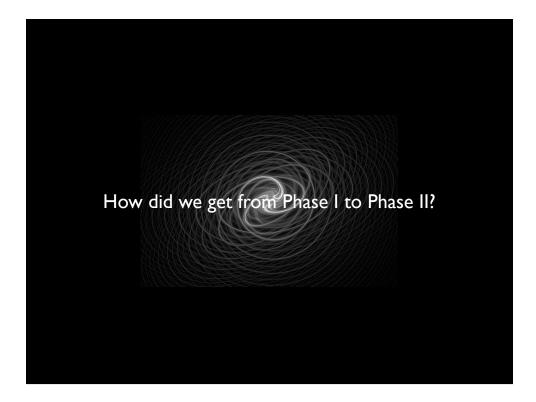

- The browser as runtime remains fundamental
- Recognize that the browser can improve life in new ways that we haven't explored yet
- Ask ourselves:
- What parts of Internet experience aren't open, user-centric, distributed, participatory and public?
 Can the browser provide platform services in these areas?

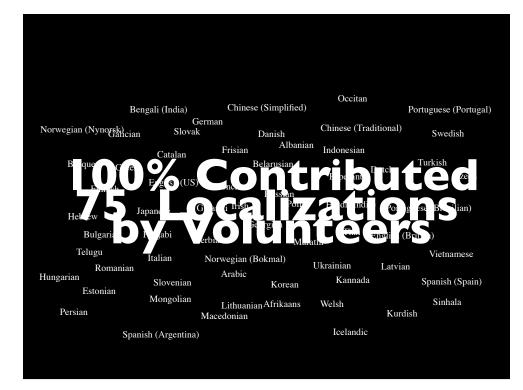

Mozilla Community through the lens of localization

Localized versions of Firefox covers over 97% of the world's Internet population with a language option those users speak natively

How do we accomplish this?

Strategy to Scale

Engage Empower

Clearly defined roles

Successful 110n teams in the Mozilla community have mapped out specific roles and task for their team members (i.e. products, web, special projects, QA, etc.)

Explicit outline of tasks to complete

Clearly defining tasks so no confusion exists on how to participate

Deadlines

We release software and set specific timelines so volunteers know when to contribute

Create opportunities for participation

Newcomers are often set to new, untouched tasks that need a team leader -- *always* something to be localized

Trust

Mozilla asks localizers to make strategic decisions for the localized version of Firefox

Full-transparency

Strive to have open lines of communication at all times!

Communication

Provide multiple communication channels for participation

- IRC server
- email
- Bugzilla
- Newsgroups
- Twitter
- etc.

Mozilla's localization-drivers are available around the clock to support our community

Tools

Infrastructure

• Compare-locales & Dashboards

Translation

• Narro, Translate Tookit, Silme, Koala and Verbatim

Testing

• Litmus
