The hardware home button toggles to the Home screen.

Idle screen
Badge behavior: Core tray: key apps

Homescreen: Preview closed
Badge notifications in key app dock behaves
according to app.

Description

The core tray apps cannot be custom-
ized.

Notifications in the core tray apps ap-
pears as part of the app icon and will
reflect the number of "unmarked" notifi-
cations from the application. If entering
the call history, the notification number
will be cleared. However, if entering the
messages application, the user will only
mark notifications as read when opening
the specific message thread.

Note that the notification number is part
of the icon in order not to enter the area
of the carousel.
