One and Done

Contribute to Mozilla QA - one task at a time, one day at a time.

Sign in with Mozilla Persona

[What is Mozilla Persona?](#)

Come and make a meaningful contribution to Mozilla QA on a daily basis. There are lots of ways for you to get involved, even if you're not a technical person. Pick just one task based on your time availability and skill level. Complete it with plenty of help from Mozilla QA staff and other contributors like you. Work with us to improve the quality of what we produce and feel rewarded. Become a part of the Mozilla community and help us make the Web a better place for the millions of people who use it.

Our Teams

Desktop Firefox

We test Desktop Firefox for new features and resolved issues before release. Help us hunt down bugs!

Mobile Firefox

We test Firefox for Android to ensure web content is viewable, acceptable and ready for consumption.

Firefox OS

We test Firefox OS, a new mobile operating system, and Marketplace, that offers apps.

Web QA

We ensure that all Mozilla websites are high quality, secure, and user friendly.

Services

We aim to improve the quality of Firefox, desktop and mobile. We also test all Mozilla Labs projects.

Automation

We build automated tests to run against Mozilla websites to make sure they are working as expected.

Thunderbird

We test the Thunderbird mail client for resolved issues before release.

Get Involved

You can help us with tasks that are common across all our teams:

- Verify bugs in Bugzilla marked 'Fixed'.
- Verify bugs in Bugzilla marked 'Unconfirmed'.
- Verify bugs in Bugzilla flagged 'qawanted'.
- Verify bugs in Bugzilla flagged 'regression-window-wanted'.
- Verify bugs in Bugzilla flagged 'steps to reproduce wanted'.
- Create test cases in MozTrap, our new test case management tool.
- Execute test cases from MozTrap.

Desktop Firefox

- Participate in our Desktop Firefox Test Days. Test new features and file bugs.
- Run smoke tests in MozTrap on beta builds of Desktop Firefox on a weekly basis.
- Execute test cases from MozTrap for new features once or twice in our 6-week release cycle.
- Do exploratory testing of features once or twice in our 6-week release cycle.

Mobile Firefox

- Participate in our Mobile Firefox Test Days. Test new features and file bugs.
- Run smoke tests in MozTrap on beta builds of Mobile Firefox on a weekly basis.

Services

- Participate in our Firefox Sync Test Days. Test new features and file bugs.

Automation

- Pick an Issue in our list of GitHub Issues that needs automation for a particular project

Your technical skills and time availability

Mozilla QA welcomes your contribution, no matter what your level of expertise or how much time you have. In each case below, choose the option that best applies to you.

Technical Skills

- I know how to use the web to check my email and stay in touch with friends using Facebook (or other social networks). I have basic Internet and computer skills.
- I know how to use the web to check my email, visit different websites, and download and install programs. I know how to create files, open and edit them. I have advanced Internet and computer skills.
- I know how to test software, submit feedback and file bugs. I have skills expected of a software quality assurance professional.
- I know how to write code. I understand software development.

Time Available

- I can contribute less than **30 minutes** a day.
- I can contribute about **one hour** a day.
- I can contribute upto **four hours** a day.

Your areas of interest

You can help us with tasks that are common across all our teams. Choose the areas that interest you the most.

- Work with bugs.** We use Bugzilla use to keep track of bugs and new features across all our projects. You can help us update bugs by adding any needed information, narrowing down the problem, or figuring out the exact set of steps needed to reproduce the problem.
- Test new features.** When we add new features to our products, we release a beta version or release candidate. You can help us test these under different conditions to make sure that the software is high-quality when released.
- Contribute to our knowledge base.** When we release brand new products or add new features to our products, we write documentation to help our users. You can help us make the documentation better or write what is missing. If you speak more than one language, you can help us with translation.
- Write a test.** When we add new features to our products, we write test cases to make sure that the features behave as expected. You can help us add test cases to the test suite so that the entire functionality is covered.
- Write automated tests.** We use automated software testing tools to run tests over and over again during development cycles. This saves us time and money, and also improves our test coverage and accuracy. If you have programming skills, you can help us write automation test scripts.

Welcome, [jane_doe](#) |

Testday Firefox 16 Beta 4 Smoketests

Thank you!

Thank you for contributing to Mozilla QA! Your time and effort are highly appreciated. We'd love to hear from you. Tell us about your experience here.

We'd love to know what we're doing right, what to keep doing, and what to start doing.

[No, thanks.](#)

Create Tasks

Create tasks for contributors to work on. You can start with [Raw Templates](#) for common tasks and customize them for a particular [Area of Interest](#). You can experiment with task templates while keeping them private under [My Templates](#).

Read Feedback

Read the [feedback](#) contributors leave when they finish working on their tasks. Participate in [discussion](#) in how to make things better.

Areas of Interest

Define [areas of interest](#) in which community contributors may participate. Areas can have a hierarchy. You can optionally create [sub areas](#) under parent areas.

Rewards

Reward your contributors for tasks successfully completed! You can define [points earned per task](#) and how to [exchange them for gear](#). You can also help contributors can [earn badges](#) for their hard work.

Reports

Get a high level overview of everything that's going on. See which [tasks are in progress](#), which [contributors are active](#), how many [points have been earned](#) and [much more](#).
