What is “One and Done”?

• A workflow where Mozilla Community Contributors can pick tasks and work on them - one at a time, one day at a time - and feel good about doing them.
Areas of Interest

• Find an area of your interest from among the many projects at Mozilla QA.

Desktop Firefox
We test Desktop Firefox for new features and resolved issues before release. Help us hunt down bugs!

Mobile Firefox
We test Firefox for Android to ensure web content is viewable, acceptable and ready for consumption.

Firefox OS
We test Firefox OS, a new mobile operating system, and Marketplace, that offers apps.

Web QA
We ensure that all Mozilla websites are high quality, secure, and user friendly.

Services
We aim to improve the quality of Firefox, desktop and mobile. We also test all Mozilla Labs projects.

Automation
We build automated tests to run against Mozilla websites to make sure they are working as expected.

Thunderbird
We test the Thunderbird mail client for resolved issues before release.
