Weekly team meeting for the B2G UX team. Please be ready to present your designs for this week.

This design makes the event very easy to read because it only shows the event data without cluttering up the UI with labels and such.

There also are no read-only and edit modes to make it very quick to make changes with a tap.

SELECT EVENT DATE

This is the exact same UI as in Month view that shows today highlighted and busy timeline overview bar to give you a bit more information for selecting dates.
