h% - Horizontal Percentage. The percentage of people who have a certain characteristic defined by a row heading.  
v% - Vertical Percentage. The percentage of people who have a certain characteristic defined by a column heading.  
i - Index. This number indicates selectivity; that is, which group, compared to the total, meet the criteria of the horizontal and the vertical characteristics. The index works both ways; both horizontally or vertically.  
\* - Index values are not available, as one of the variables is populated from a multiple-select question.

h% - Horizontal Percentage. The percentage of people who have a certain characteristic defined by a row heading.

v% - Vertical Percentage. The percentage of people who have a certain characteristic defined by a column heading.

i - Index. This number indicates selectivity; that is, which group, compared to the total, meet the criteria of the horizontal and the vertical characteristics. The index works both ways; both horizontally or vertically.

\* - Index values are not available, as one of the variables is populated from a multiple-select question.

h% - Horizontal Percentage. The percentage of people who have a certain characteristic defined by a row heading.

v% - Vertical Percentage. The percentage of people who have a certain characteristic defined by a column heading.

i - Index. This number indicates selectivity; that is, which group, compared to the total, meet the criteria of the horizontal and the vertical characteristics. The index works both ways; both horizontally or vertically.

\* - Index values are not available, as one of the variables is populated from a multiple-select question.
