**Notes**

Tap on fields to start editing

Tap on Day and Hour boxes to change them

Use the system Time Picker

Invite field grows as necessary

Swipe to see more notes if full

This design makes the event very easy to read because it only shows the event data without cluttering up the UI with labels and such.

There also are no read-only and edit modes to make it very quick to make changes with a tap.

Invite field works exactly as in email:

### SELECT EVENT DATE

This is the exact same UI as in Month view that shows today highlighted and busy timeline overview bar to give you a bit more information for selecting dates.

The screenshot shows a mobile application interface for editing an event. At the top, there is a status bar with the time 2:10 and various system icons. Below the status bar is a header with three buttons: 'CANCEL', 'EVENT', and 'SAVE'. The main content area is divided into several sections: a title 'B2G Work Week', a location 'San Diego' with an 'All Day' checkbox checked, a date range from 'Monday May 7, 2012' to 'Friday May 11, 2012', and two buttons labeled 'Repeat' and 'Alert'. At the bottom of the form, there is a list of attendees: 'Josh, Patryk, Larissa, Casey, Frank' followed by a plus sign button. The event description at the very bottom reads: 'Weekly team meeting for the B2G UX team. Please be ready to present your designs for this week.'

When [All Day] is selected, the date fields change to first and last days of event.

**SELECT START AND END DATES**

Tap [From] and [To] to select start and end dates

Default to either [From] or [To] depending whether you tapped on the From or To date on the Event details screen.

Regardless of how you arrived on this dialog you can always change both From and To dates.
