

# Open Web Device

## Lock Screen

Release 2 // Sprint 2

# Lock Screen

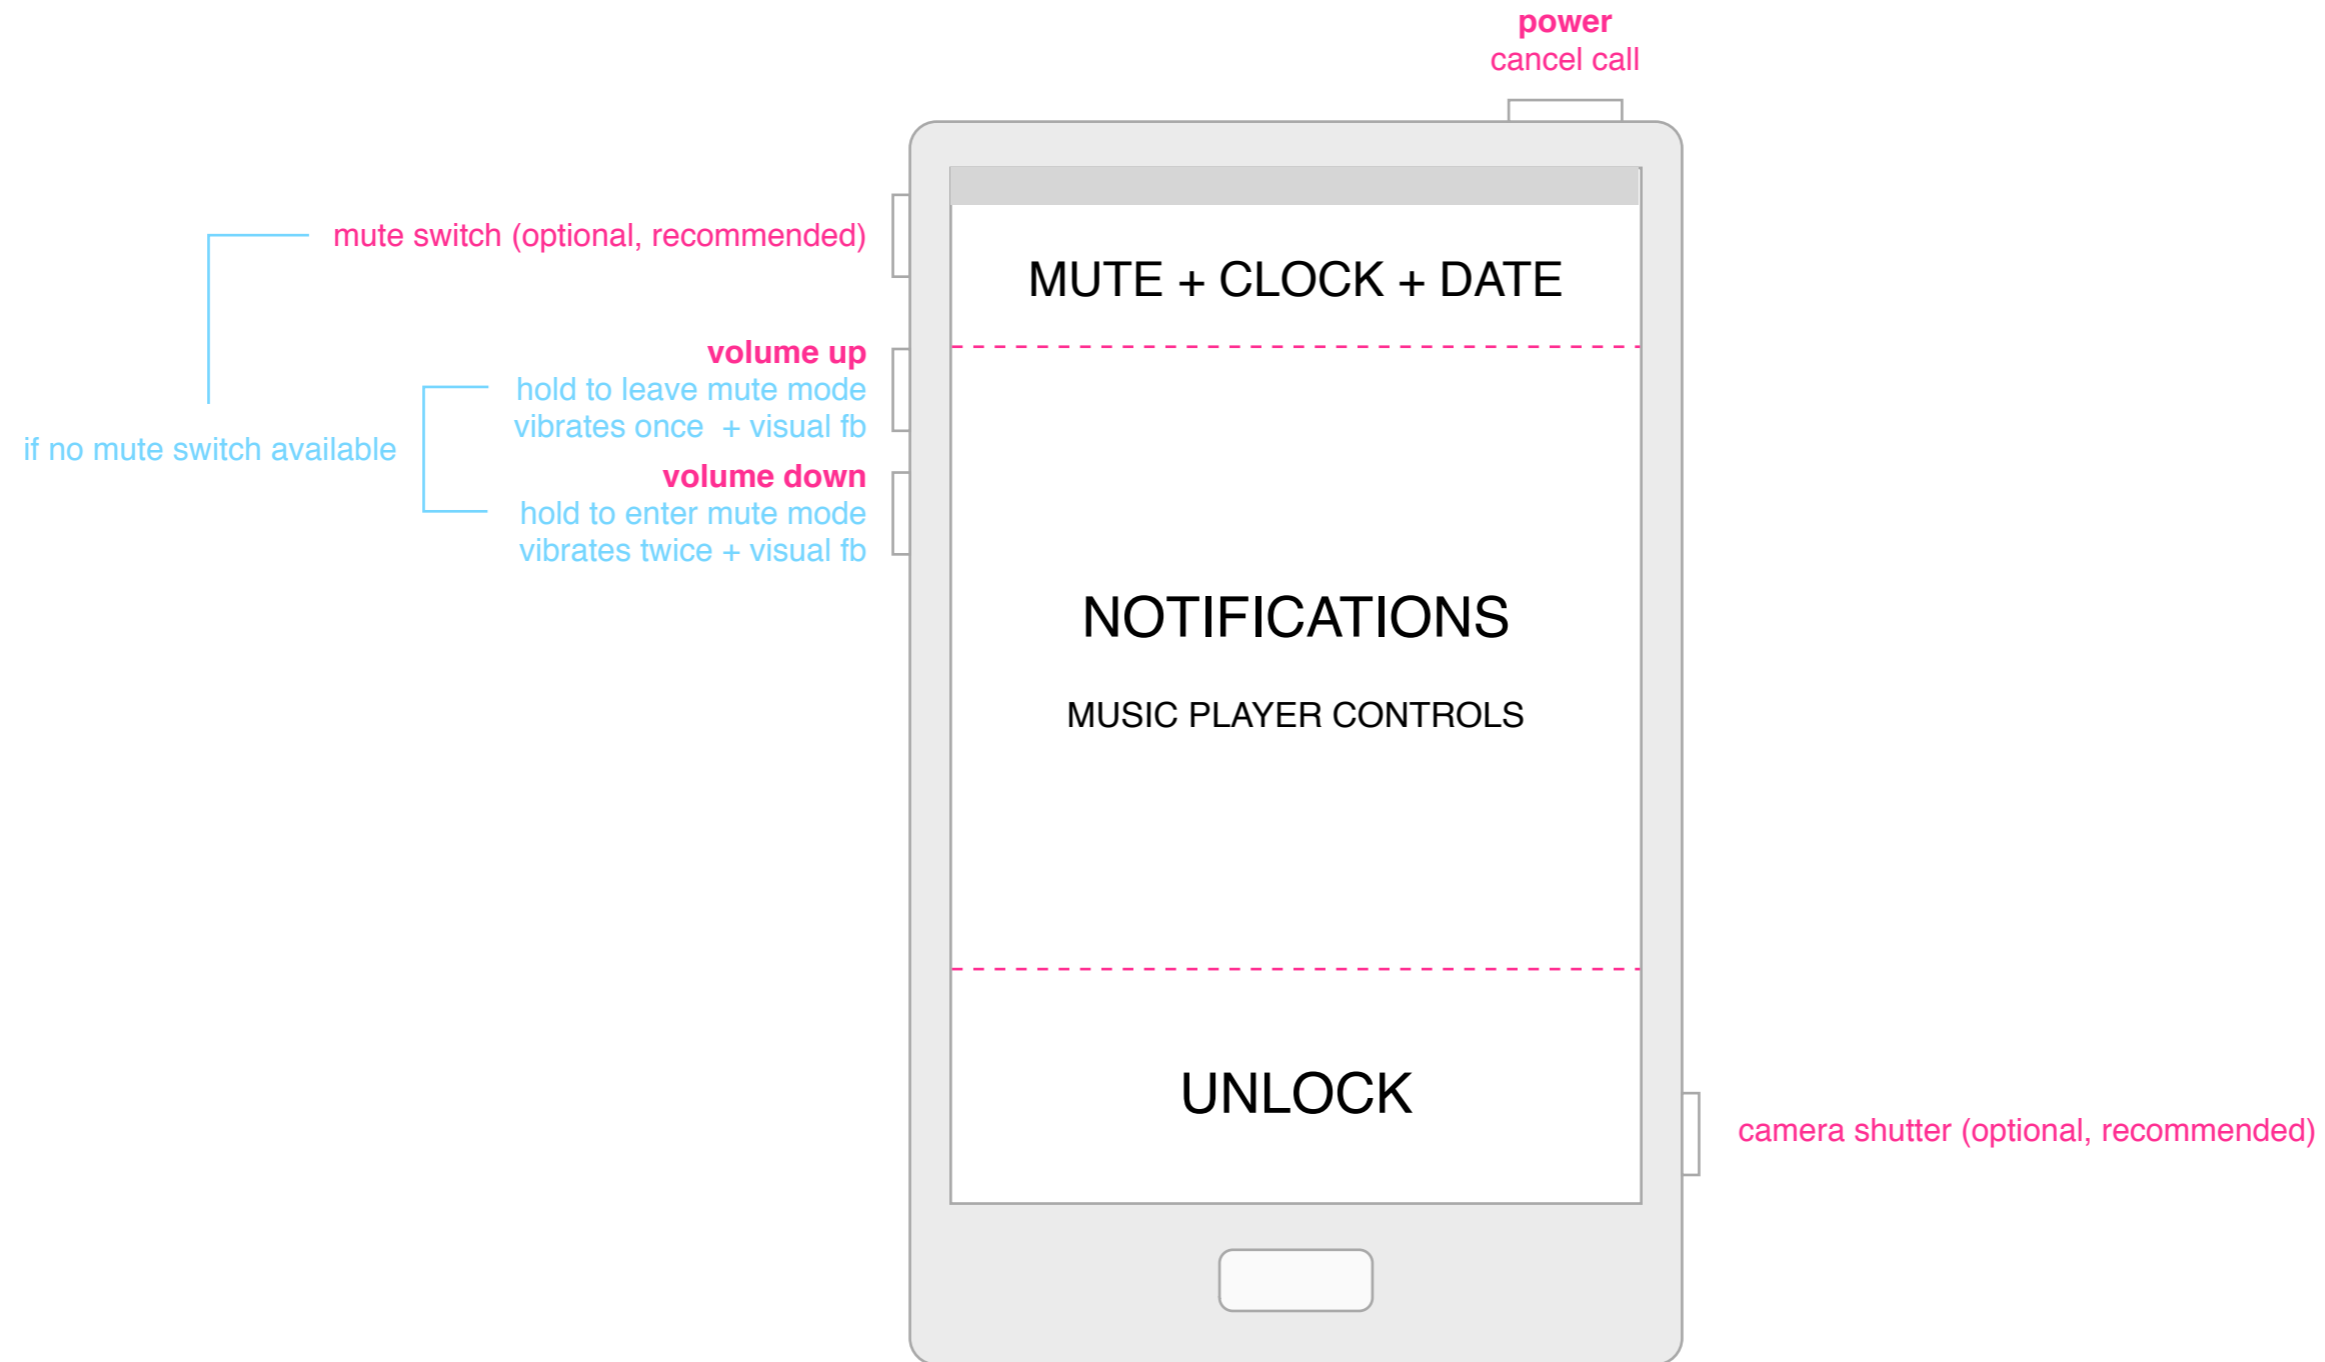

## Security Flow

# Lock Screen

## Main Regions

A dedicated mute switch and camera shutter are both recommended

# Lock Screen

## Clock, Date, Info

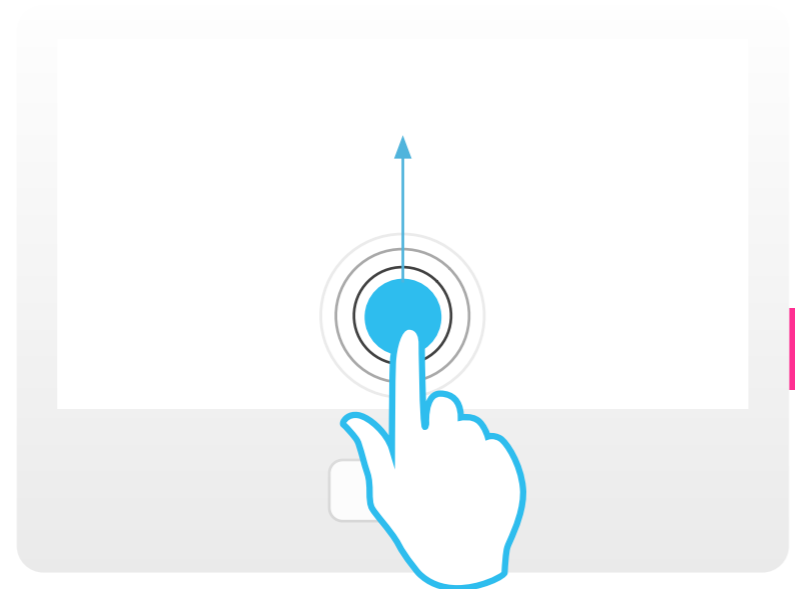

The clock/date arrangement should be determined by the visual team, but the elements should prevail.

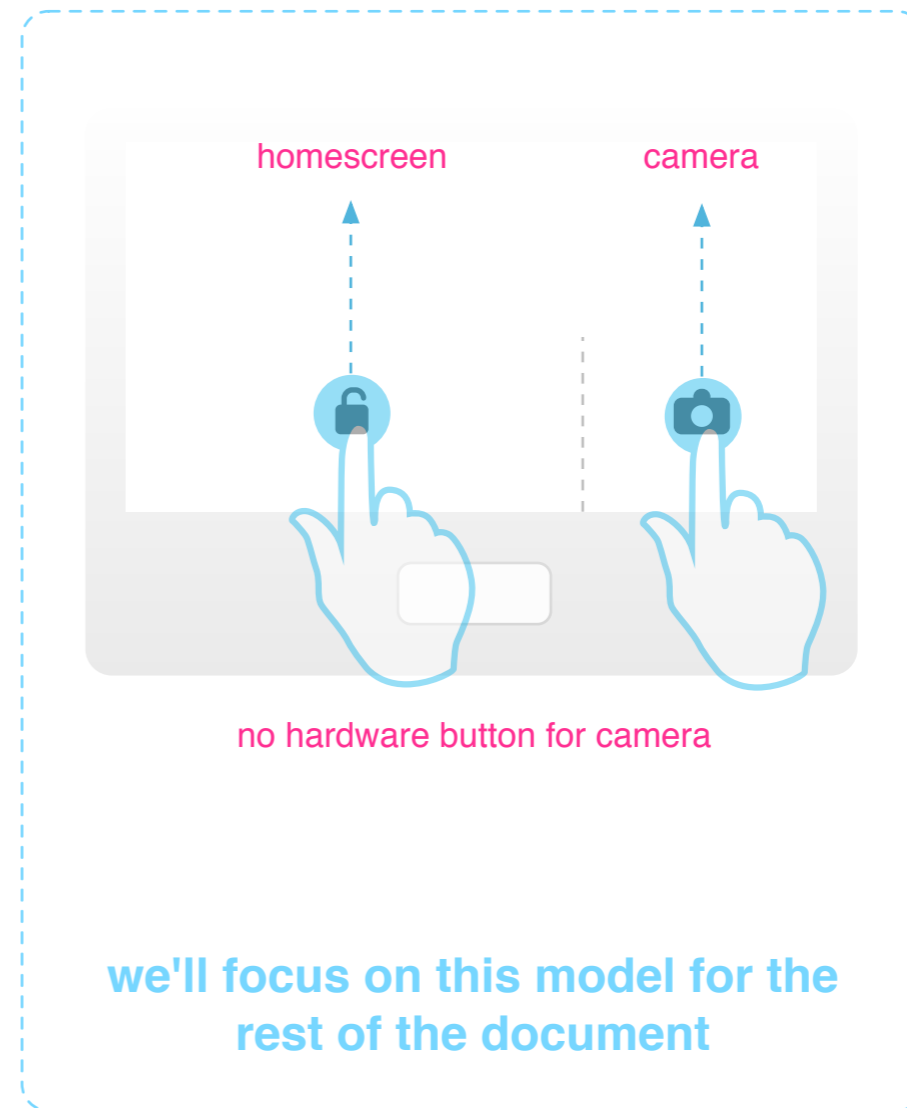

# Lock Screen

## Unlock Gestures

Different options depending on hardware button availability.

with hardware button for camera

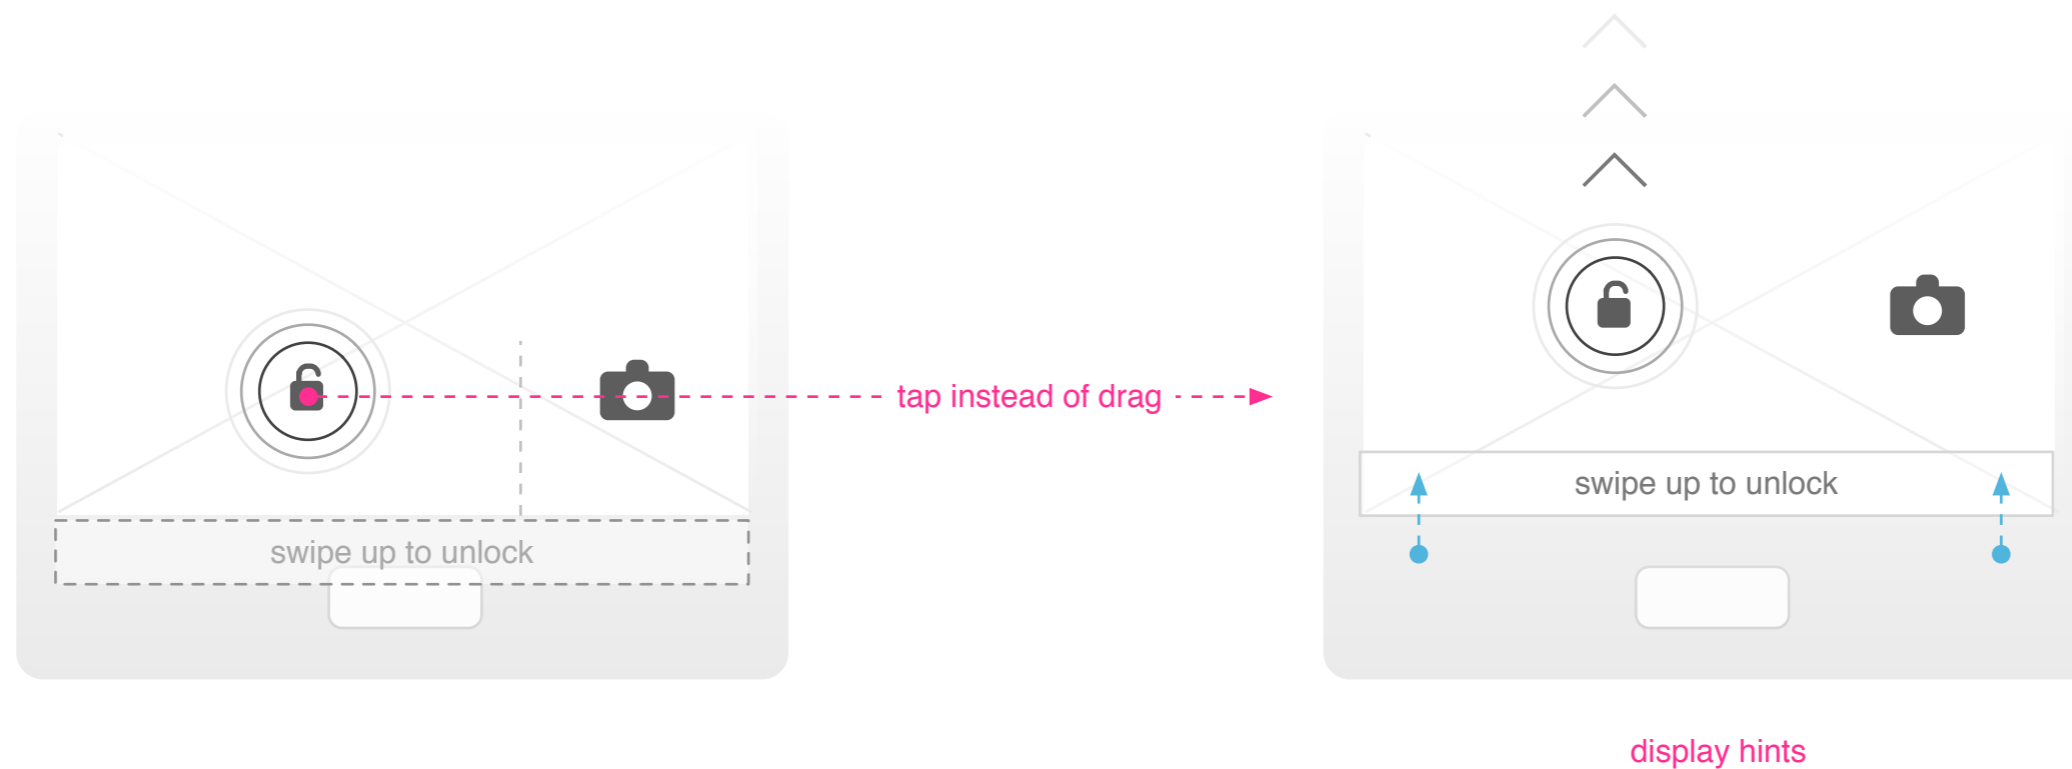

no hardware button for camera

we'll focus on this model for the rest of the document

# Lock Screen

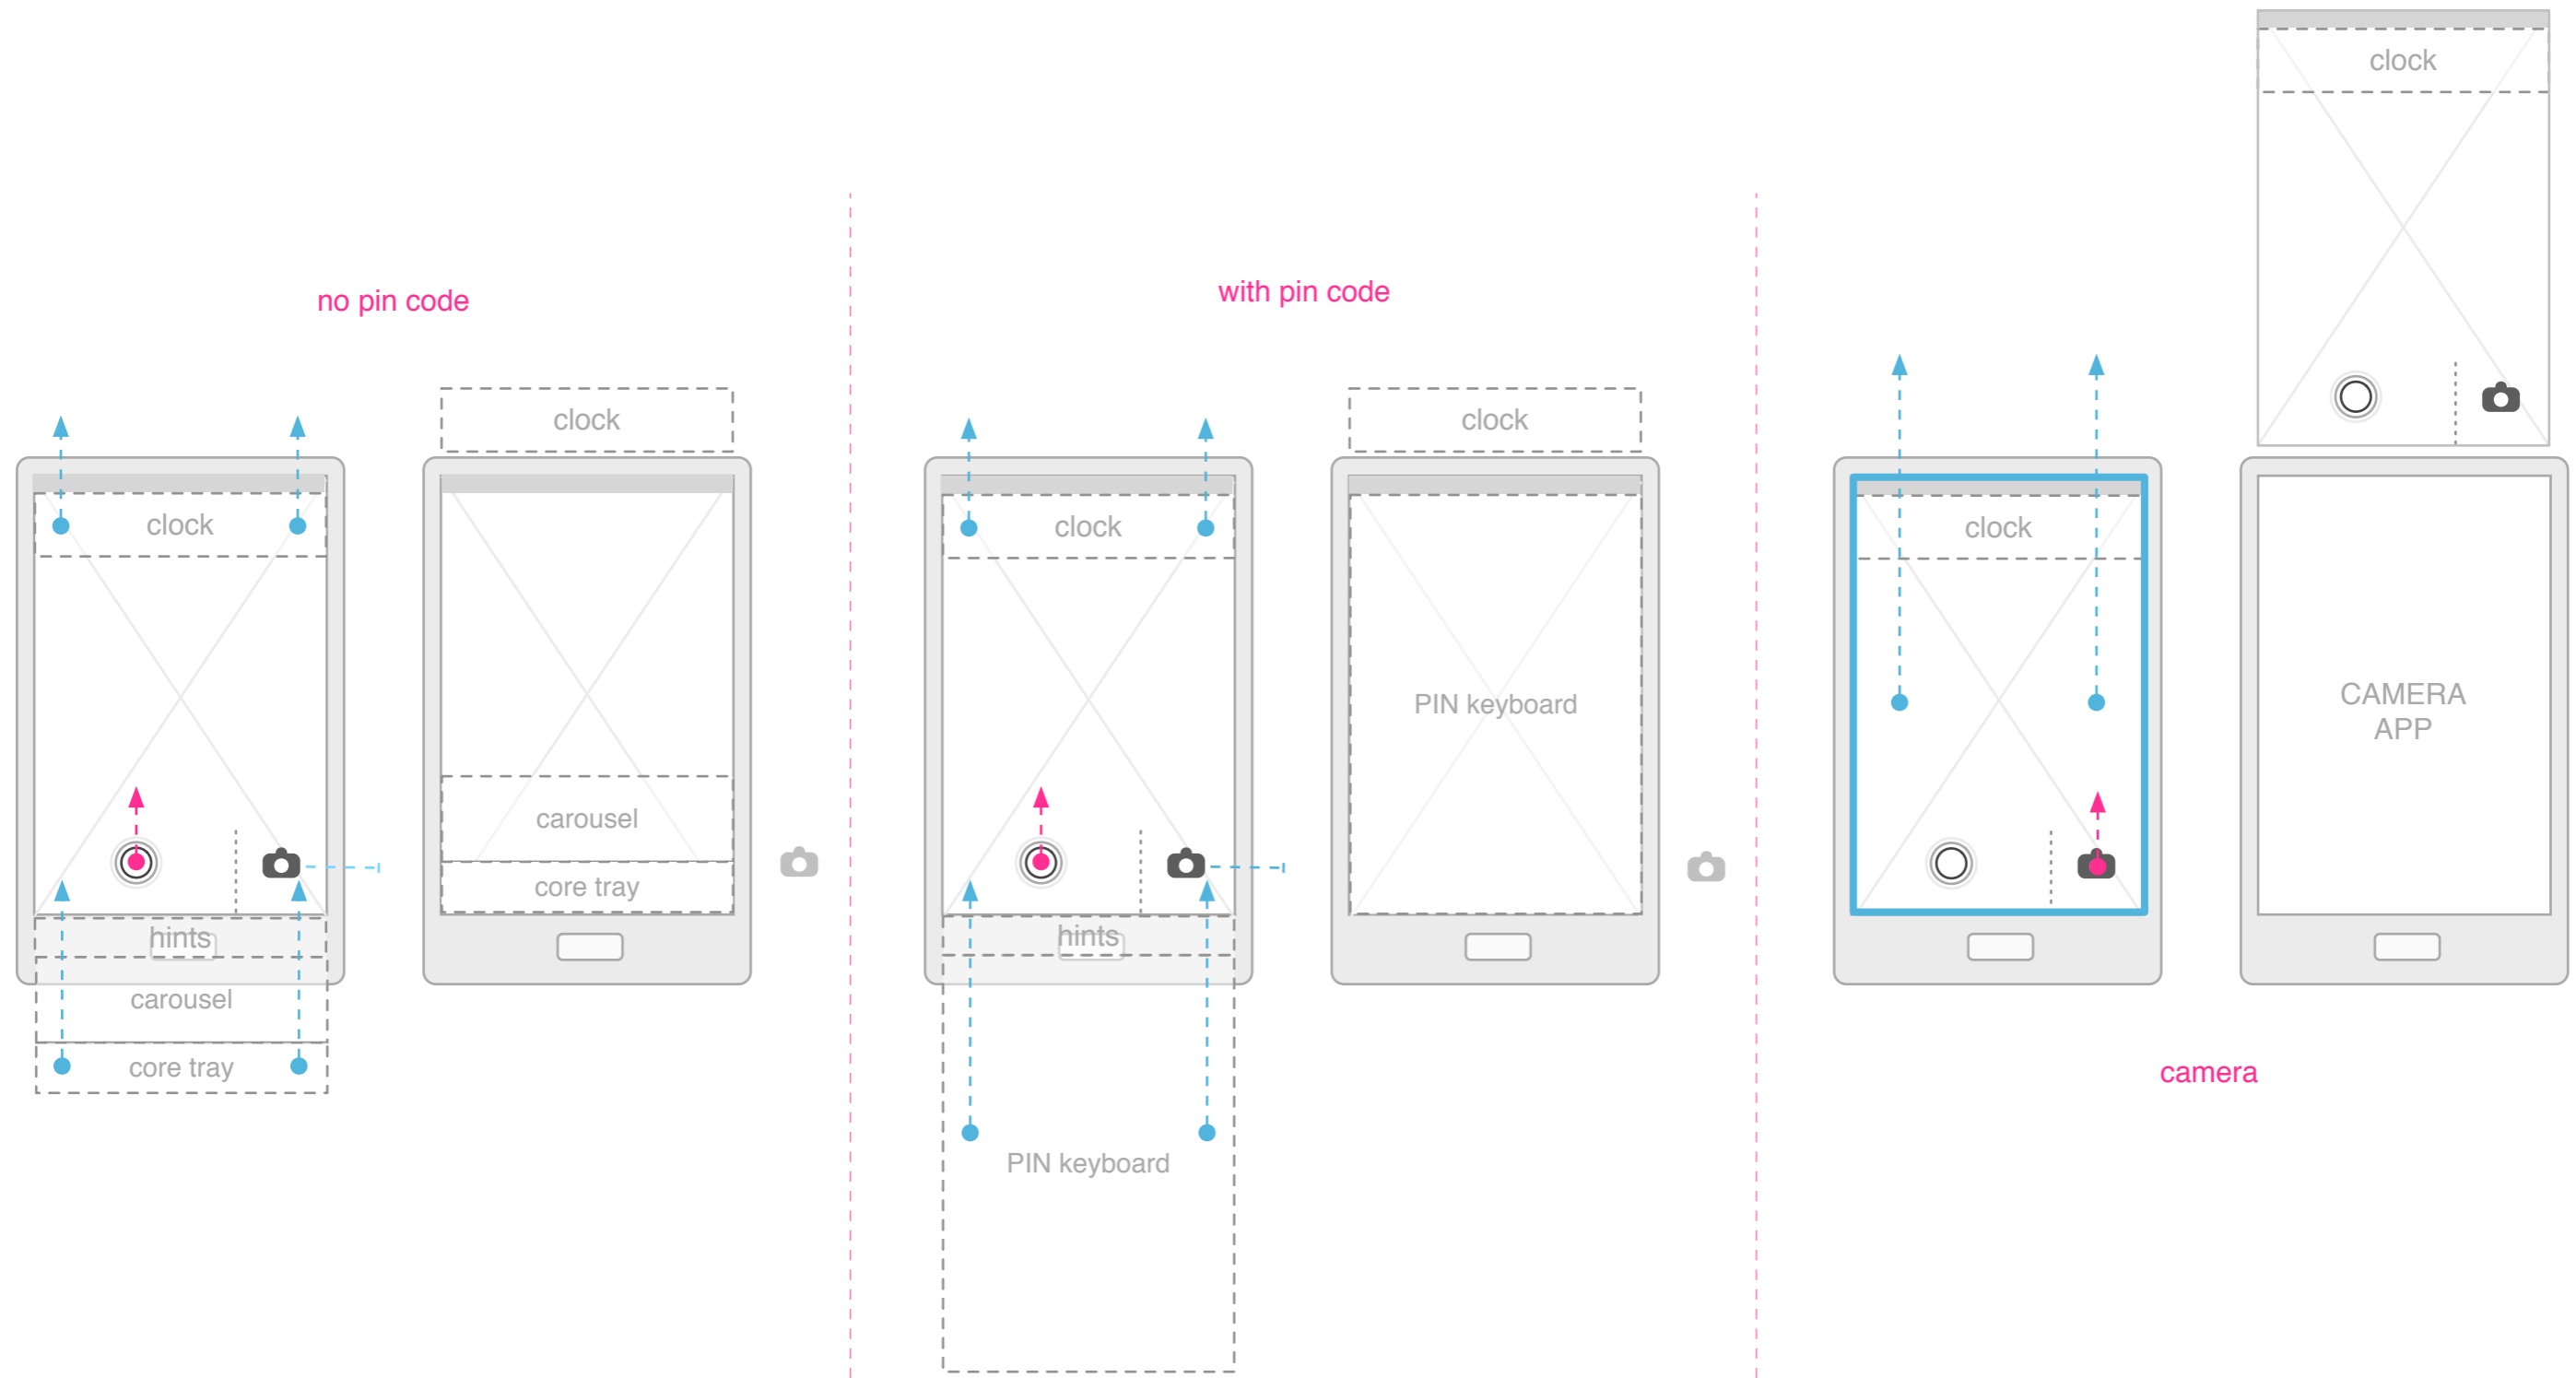

## Hints

Tapping instead of dragging (or bouncing automatically in the case of incoming calls or alarms) will display hints hidden below the bottom of screen. Hints could be displayed a small number of times (even once), or maybe/additionally in Settings.

# Lock Screen

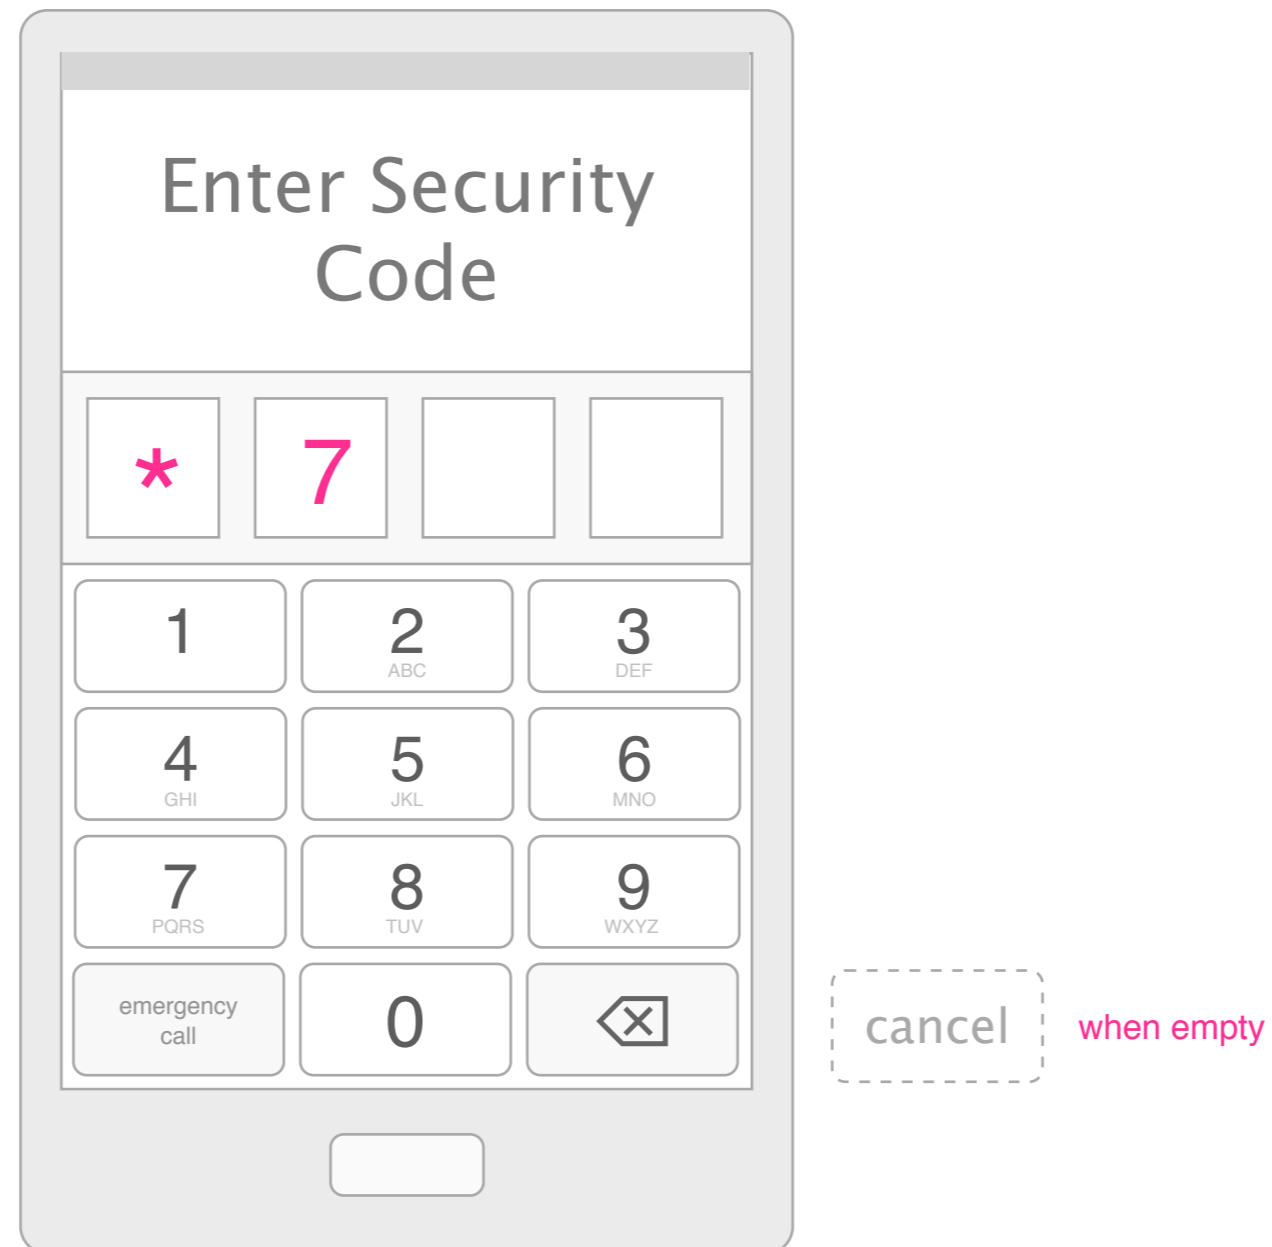

## Mental Map and Transitions

# Lock Screen

## Entering PIN Code

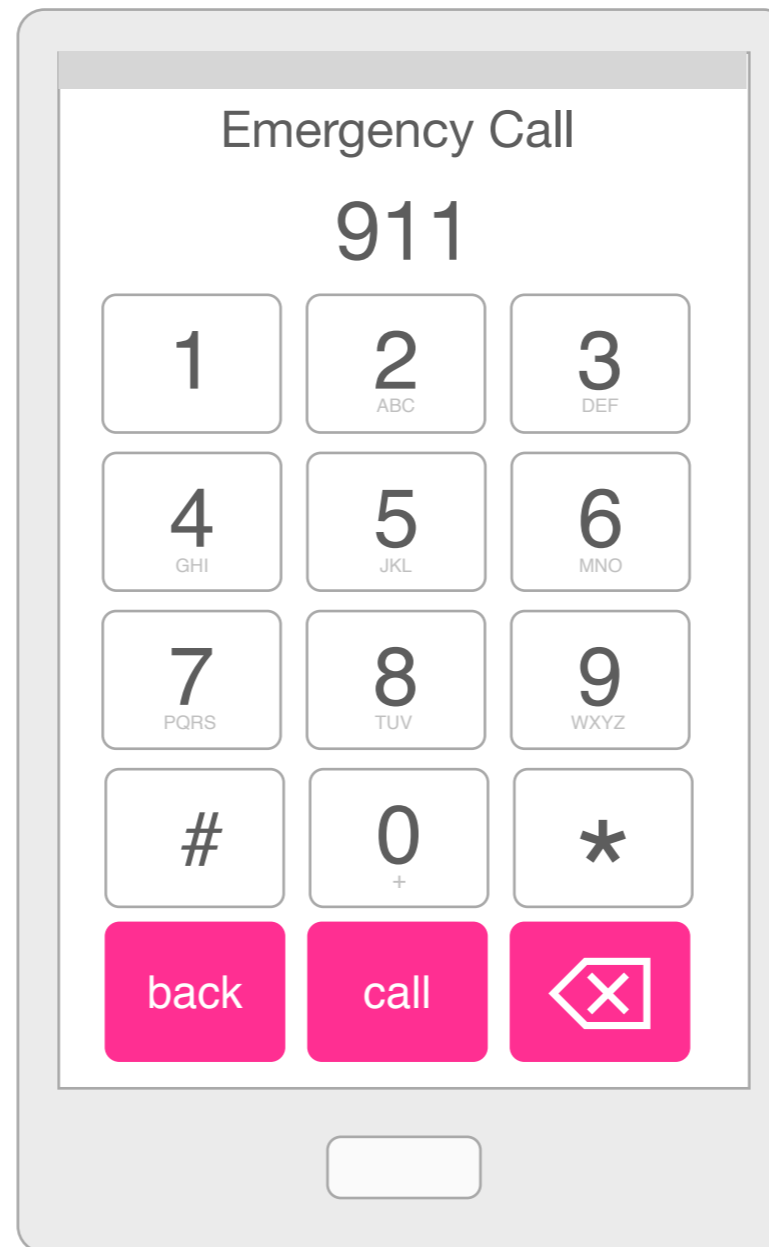

Consecutive attempts could be delayed if we're providing some sort of remote wiping functionality.

# Lock Screen

## Emergency Call V1

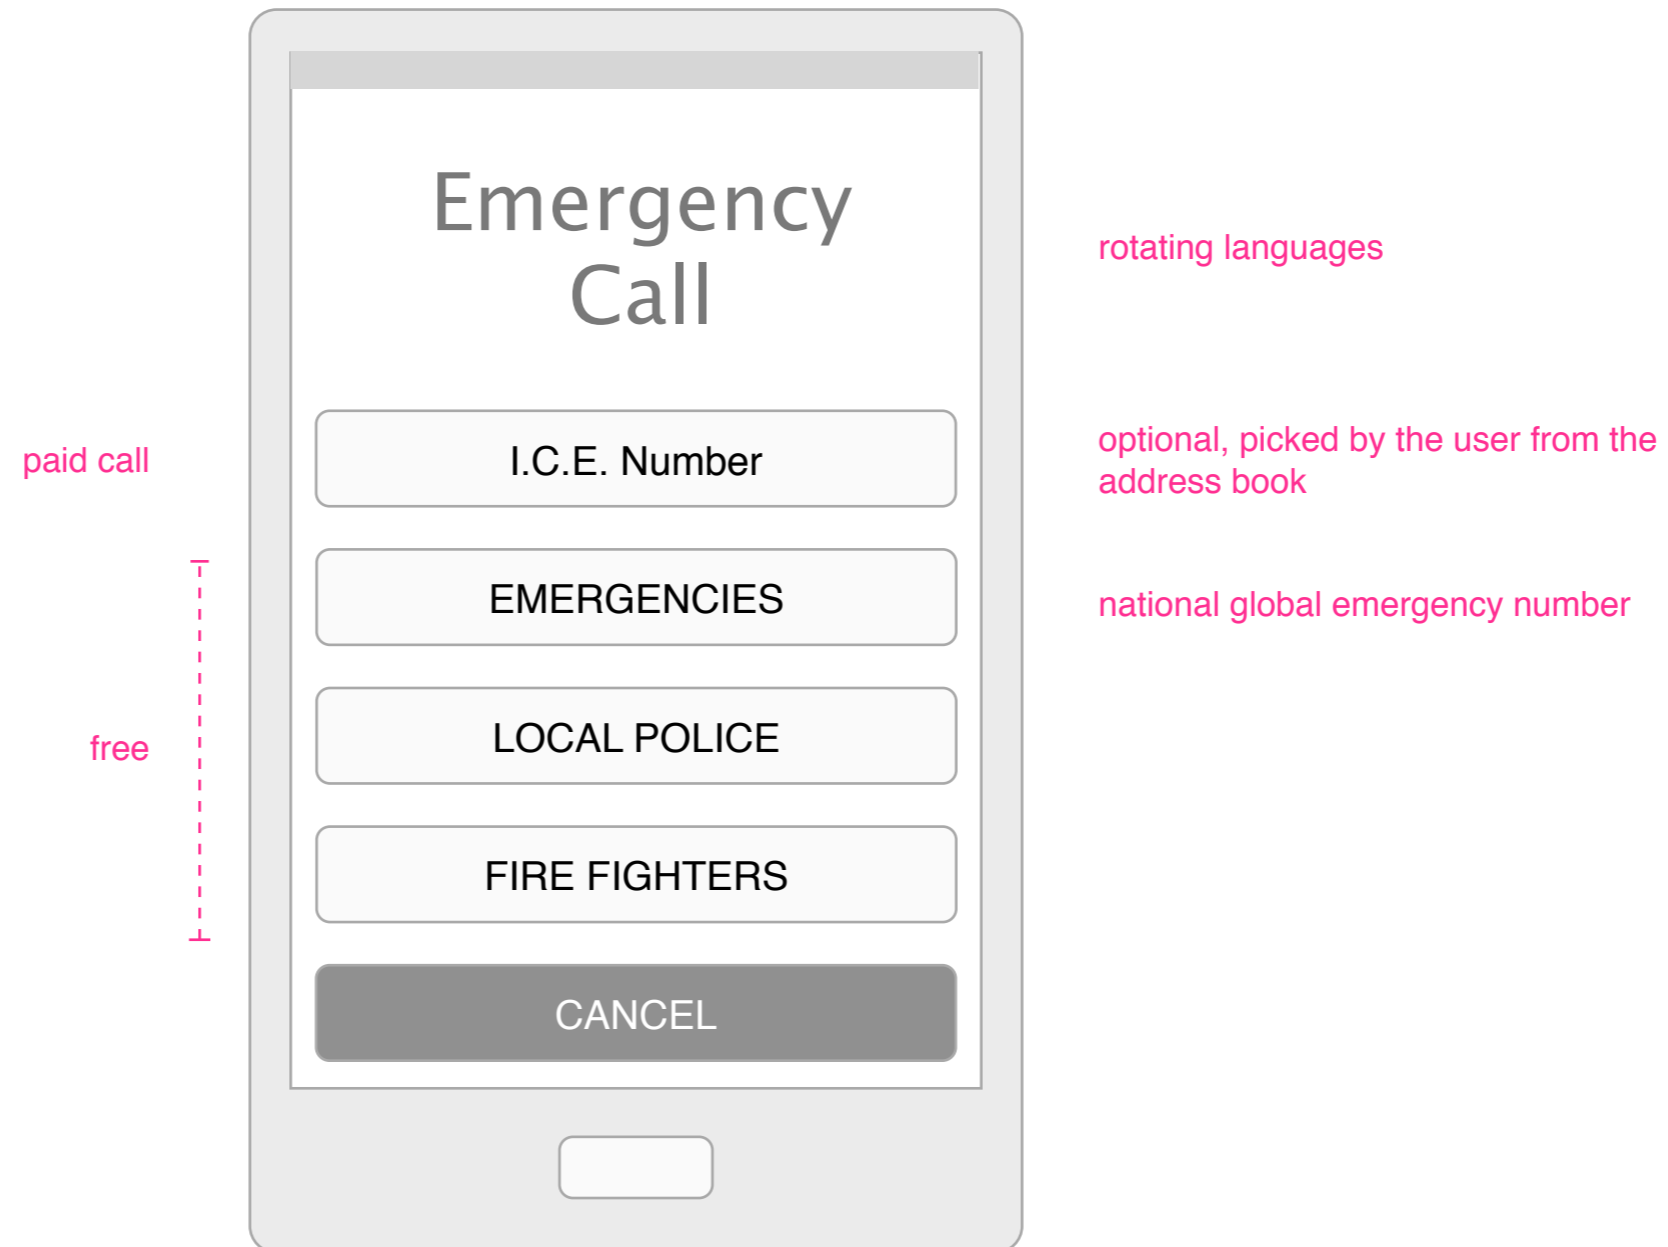

rotating languages

# Lock Screen

## Emergency Call V2

No keypad; just a list of common **local (even if abroad)** emergency numbers plus (optionally) one chosen by the user (mother, husband, etc.), which could be useful in mild emergencies or lost phone cases.

# Lock Screen

## Incoming Phone Call

# Lock Screen

## Notifications

These notifications clear once the device is unlocked.

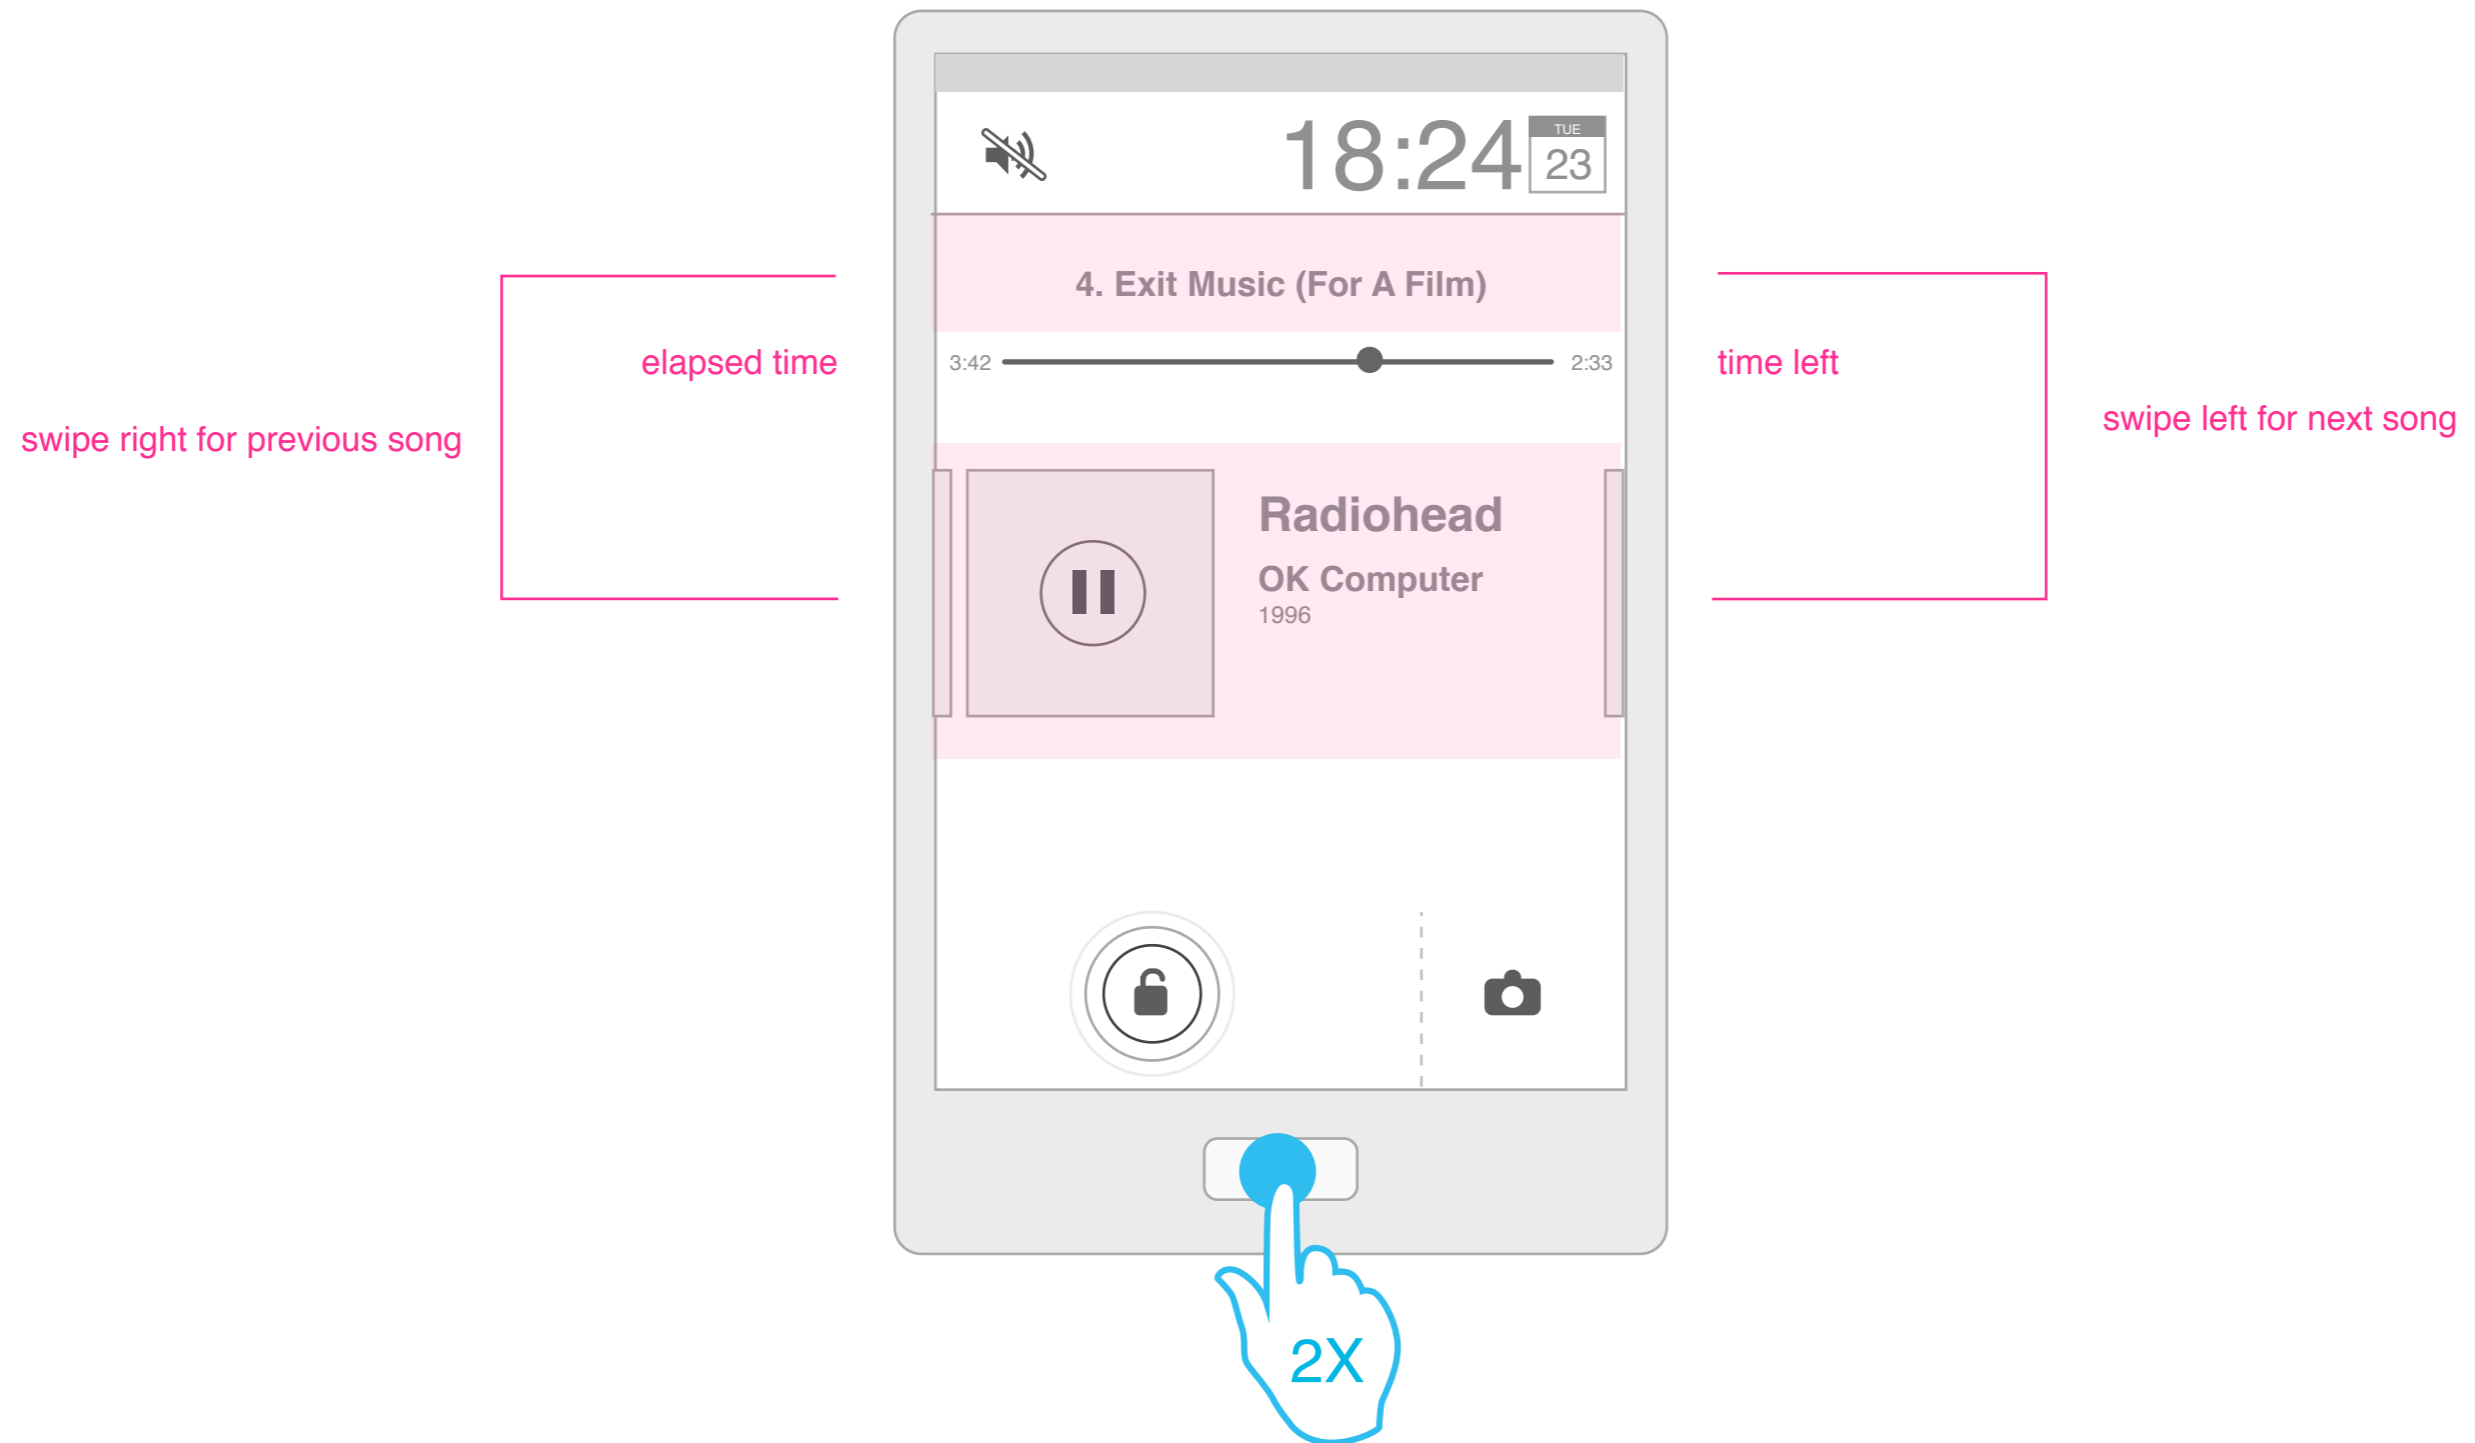

tapping a notifications allows for  
unlocking via swipe

# Lock Screen

## Music Player Controls

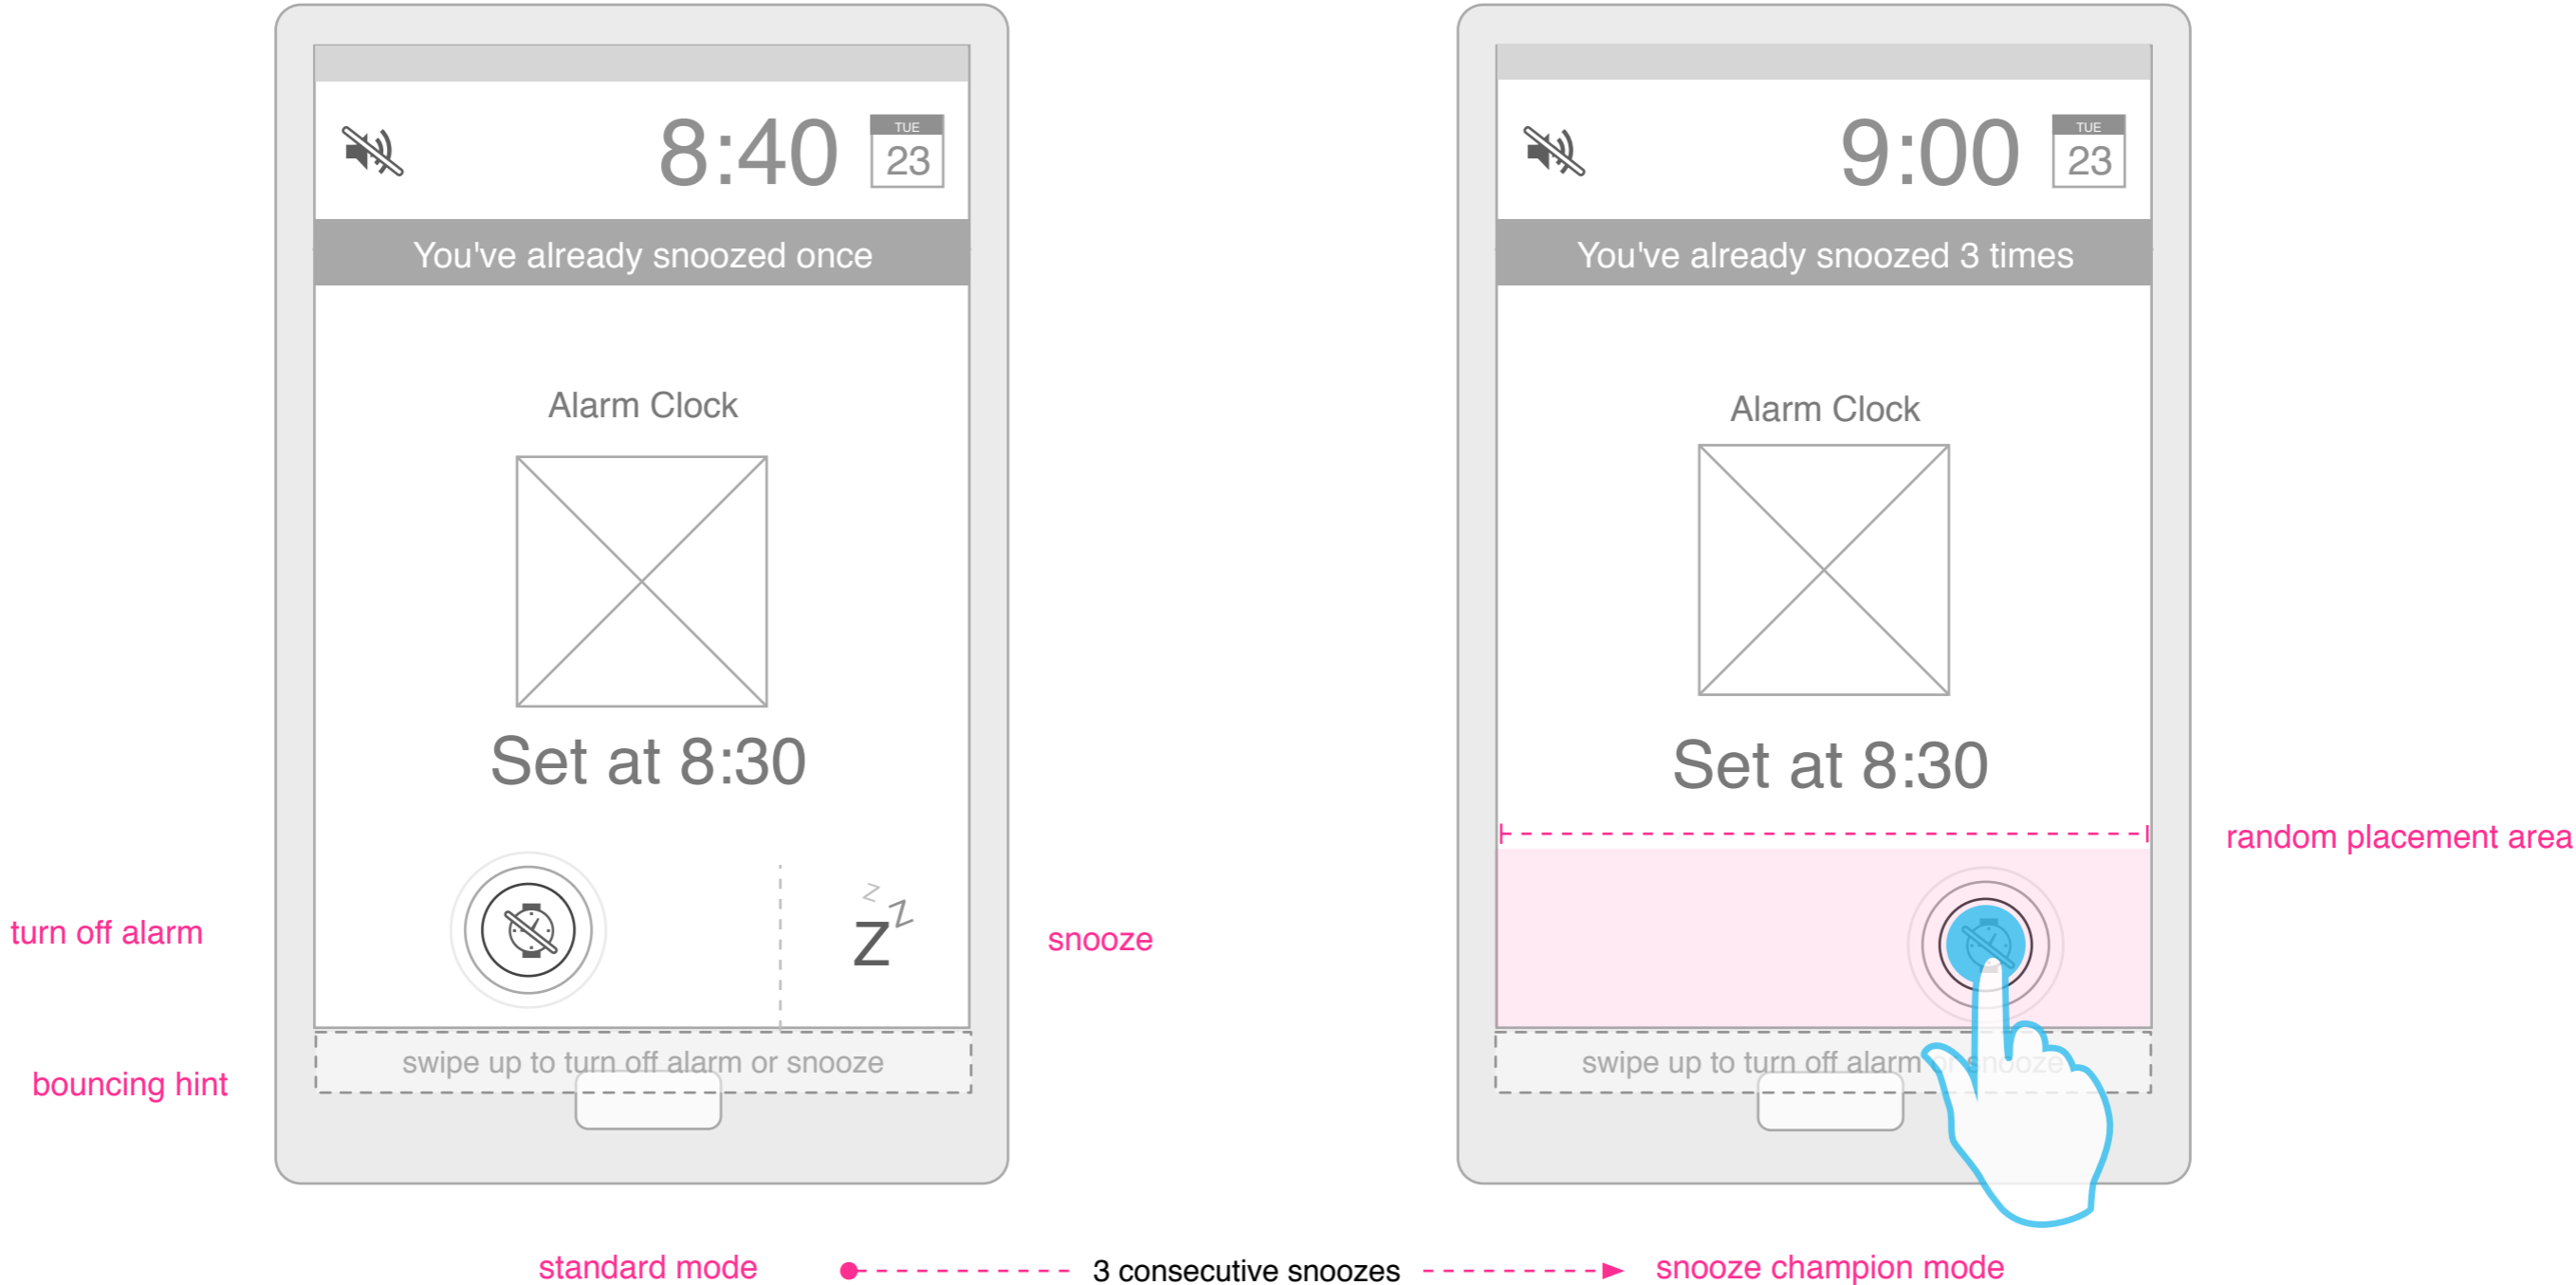

Double tapping the home button while on the lock screen **toggles** between notifications and music player controls.

# Lock Screen

## Alarm

Two modes of difficulty to unlock. Maybe transition between them after a certain number of snoozes.

# Lock Screen

## Timer
